Proudly rated 'Excellent'

“
Had an ATAG boiler installed 14 months ago. So glad we chose ATAG. We are saving money and have a warm home and lashings of hot water into the bargain.
Jane Talbot

”

“
First class boiler. Quiet, efficient and love the controls from my phone so can change the settings before I get home.
D Harris

”

“
Had an ATAG boiler installed. Really happy with this boiler, very quiet and efficient and reasonably priced. And would recommend checking them out if you are considering buying a new boiler.
Keith Boughey

”

“
Now that I have had my new boiler for one year, I can report that this is the best most efficient boiler I have ever had. First class on the fitting and the boiler. Also due to the way it's made it is quicker to service.
David Hobbs

”

“
The ATAG boiler is the best improvement we have made to our home. It's efficient, cost effective and saves money. The warranty is fabulous. The after-service contact is fab. Recommended by our plumber and we would definitely recommend ATAG to anyone.
K Jones

”

“
We have the iC Economiser. It was recommended to us by our service engineer of 20 years to replace our old boiler. It has been doing a great job for 9 months and we couldn't be happier with it. It seems nice and compact and the hot water in particular seems better to us compared with our previous two boilers from other well-known brands.
B Herring

”

“
We looked extensively finding the right boiler... There are many combination boilers available, but we were impressed with ATAG. It looks sleek and runs very quietly and works efficiently. We opted for the ONE Zone controller, which is easy to use and can be accessed from a smart phone. The lengthy warranty gives us peace of mind too. We are very impressed. Our energy bills have reduced too!
Alison Mathew

”

The **reliable** and **responsible** choice for your home

Buying a new boiler is a considerable investment and you need to be sure it's going to keep you warm for years to come. That's why all ATAG boilers come with 12 year warranty as standard with the option to extend to 18 years.

ATAG boilers have a great reputation for being reliable, economical to run and keeping your home warm and cosy.

By upgrading to an ATAG boiler, not only can you save money on your heating bills, but our industry leading warranties mean that if your boiler breaks down you won't have to pay a penny to get it fixed for up to 18 years.

We combine engineering excellence with superior materials to give you a boiler that's built to last and very efficient. What's more, our boilers are designed to maintain their efficiency throughout their lifespan – meaning you will continue to save money year after year.

At ATAG, we take our environmental responsibilities very seriously. As well as making highly efficient boilers, which helps to minimise carbon emissions, our latest range of boilers are designed to work using a blend of natural gas and hydrogen which can reduce emissions significantly.

In addition, 95% of our boiler packaging is recyclable.

— ULTIMATE EFFICIENCY —
iC Economiser Plus
Combination boilers

Inside each ATAG Economiser Plus boiler, there is a revolutionary device which recycles lost heat. In doing so, it protects the environment while helping to save on your annual gas bills.

Due to its unique built-in Passive Flue Gas Heat Recovery Device (PFGHRD), the ATAG iC Economiser Plus is the only boiler that exceeds all the Government's Boiler Plus legal recommendations without having to purchase an expensive add-on.

iS System High efficiency boilers

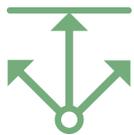

System boilers are traditionally installed with an unvented hot water cylinder to provide greater hot water capacity.

This is particularly beneficial in homes with multiple bath or shower rooms. The fact that the in-built ErP pump and controls are contained within the boiler casing counts towards a simple and space saving solution.

i40S system.
